

ClearBank[®] Core Banking Platform has been built within the Microsoft Azure Platform using ISO 20022 standards, delivering banking services to multiple types of regulated Financial Institutions and SME's. All services provided by ClearBank[®] are accessed via our Web Portal, API or via our white label core banking solution.

Pricing

- ClearBank[®] pricing model is based around monthly charges
- Further charges are applied for accounts you create and per transaction you make and receive
- Charges are deducted on a transaction event immediately from the account and a monthly summary is available online for you to review
- Full details of our transaction tariffs are available on request

Summary

ClearBank[®] Web Portal allows our customers access to the range of banking services that we provide. Using our Web Portal means that only a low level of technical integration is required to begin using ClearBank[®] services

What does the ClearBank[®] Web Portal do for you?*

Features and Benefits

Access to the ClearBank[®] Web Portal is highly secure and we utilise IP Whitelisting and Timed One Time Password (TOTP) Multi Factor Authentication.

Through the Web Portal, you can have access to the ClearBank[®] Core Banking Platform which gives you access to a number of products and services including;

- View and download balances and statements
- View and download dashboards and reports to allow you to manage and monitor your accounts
- View real-time activity alerts to allow full control over your liquidity
- Set access restrictions
- Set up alert preferences to control what devices receive notifications
- See where your payments currently are in the settlement cycle
- Make a range of payments using the UK payment schemes; Faster Payments, Bacs or CHAPS
- Set up Direct Debits and standing orders to manage your regular payments easily and effectively

The ClearBank[®] Web Portal is supported in IE 11+, Edge, Firefox, Chrome and Safari (mac)
